

ARJUN PANT

AI and Machine Learning Engineer

+91 9354612410  pantarjun234@gmail.com  LinkedIn  GitHub  New Delhi, India

OBJECTIVE

Aspiring AI Engineer with strong foundations in Machine Learning, Deep Learning and NLP, and hands on experience building end to end ML Pipeline and deploying production ready systems. Currently expanding into full stack web development to integrate AI/ML solutions into complete, deployable applications.

EDUCATION

Guru Teg Bahadur 4th Centenary Engineering College

2026 - 2028

Btech

CGPA - 8.5

Computer Science - Artificial Intelligence and Machine Learning

SKILLS

Programming Languages: Python, C++

Machine Learning / AI: Machine Learning, Deep Learning, NLP, Transformer Architectures, Neural Networks

Frameworks & Libraries: TensorFlow, Keras, Hugging Face Transformers, Scikit-learn, Pandas, NumPy, Streamlit

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Docker, Jupyter Notebook, AWS, MLflow, CI/CD (GitHub Actions)

Soft Skills: Communication, Problem Solving, Critical Thinking

Languages Known: English, Hindi

PROJECTS

Intelligent Resume Screener |  GitHub Link

July 2026 - Present

- Built an end to end ML Pipeline combining NLP skill extraction, Sentence-BERT semantic embeddings, and XGBoost Classification to predict resume-JD match scores, achieving 83% F1-score.
- Designed a modular, config-driven architecture (ingestion, validation, transformation, training, evaluation) with leakage-safe data splitting and automated quality gates.
- Debugged and fixed a data leakage issue via feature-importance analysis, and deployed an interactive Streamlit app with PDF upload and skill-gap analysis.

Network Security System |  GitHub Link

April 2026 - Present

- Built an end-to-end MLOps pipeline for malicious URL detection — data ingestion, validation & drift detection from MongoDB, with automated preprocessing.
- Trained & compared 5 ML models (Random Forest, GBM, Decision Tree, Logistic Regression, AdaBoost) with GridSearchCV tuning, tracking experiments via MLflow on AWS.
- Deployed via FastAPI + Streamlit, containerized with Docker, and automated CI/CD (GitHub Actions → AWS ECR → EC2).

ACHIEVEMENTS AND CERTIFICATIONS

- Solved 170+ Problems on LeetCode, strengthening core Data Structures & Algorithm skills.
- Completed Udemy certification: "Complete Data Science, Machine Learning, DL, NLP Bootcamp"

ADDITIONAL INFORMATION

- Strong Interest in Data Structures & Algorithms; consistently practices problem solving to sharpen core CS fundamentals.
- Currently learning Web Development to gain full-stack understanding of how websites work end to end, with the goal of integrating AI/ML models into self-built, deployable web applications.
